Building Products

Sika®-MultiKit

Epoxy Putty

Epoxy putty for bonding, sealing, filling and repairing almost all surfaces including wood, metal, ceramics, glass, concrete and plastics, even underwater.

Will resist temperatures up to 120C and is resistant to high pressures.

Mix&Go®

Mortar Repair

All you need is a glass of water. Easy to use high quality mortar repair kit for smaller repairs. Interior and exterior use with excellent adhesion to concrete, mortar, cement blocks, stone and bricks. Can be applied overhead and over-painted in 4 – 5 hours.

Sika®-MultiSeal

Sealing Tape

Self adhesive aluminium foil tape, for fast and long lasting sealing jobs and repairs of cracks and fillings on terraces, roofing, refrigerated areas and exterior walls. It is watertight and water resistant and has excellent UV resistance. Available in grey and white.

Cleaners

Sika® Activator

Cleaner

Used to clean and prepare surfaces in bonding applications. Wipe on and wipe off.

Sika® Cleaner 205

Cleaner

Universal cleaner to prepare metallic surfaces before bonding/sealing or application of primer.

Primers

Sika® Primer 1 Primer

Ideal for use on dry concrete, cement, brick, fibre cement, plasterboard.

Sika® Primer 3 Primer

Ideal for use on damp concrete, claybrick, ceramic tiles, quarry tiles, granite, besser blocks, epoxy mortars.

Sika® Primer 215 Primer

Ideal for use on Hardwoods, softwoods, jarrah, teak, chipboard, hard plastic and marine decking applications.

Sika® Primer 210T Primer

Ideal for use on anodised aluminium, mill finished aluminium, iron, steel, zinc, chromesteel, stainless steel, zincalume coated steel, copper, brass, bronze and fibreglass.

Sika® Primer 206G & P Primer

Ideal for use on most painted surfaces, mineral glass, metal surfaces and fibreglass.

Sika® Primer 209 Primer

Ideal for use on most soft plastics, acrylics and polycarbonate perspex. Most plastics can be bonded.

Please contact your local Sika® office for application advice.

Sikaflex®-PRO

Multipurpose Polyurethane Sealant

Ideal for expansion joints and high performance external sealing applications when you require colour selection. Available in 10 different colours. Most in both cartridge and sausage. Cuttable, sandable and paintable. Approved for contact with drinking water.

Sikaflex®-11FC

Multipurpose Sealant/Adhesive

Ideal for sealing and bonding timber, concrete, stone, pavers to pools etc. Available in 4 different colours. Beige is sausage only. Cuttable, sandable and paintable. Approved for contact with drinking water.

Sikaflex®-291

Marine Sealant/ Adhesive

Exceptional performance in all non-structural bonding and sealing applications above and below the water line. Available in black and white, in both cartridge and tube. Cuttable, sandable and paintable.

Sikaflex®-227

Automotive Sealant/Adhesive

Fast curing and can accept automotive paints as soon as skinning has occurred. Ideal for most automotive bonding and sealing applications. Available in black and white cartridge, tube in white only.

Sikaflex®-221

Industrial Sealant/Adhesive

Excellent for most bonding applications, complimented by good sealing capabilities, e.g. air conditioning, roofs and gutters, sealing stitch welds, sheds and caravans. Available in black, white and grey in cartridge and sausage.

Sikaflex®-252

High Strength Structural Adhesive

Elastic adhesive with the highest strength and some flexibility, e.g. transportation and automotive panel bonding, trucks, trailers and caravans. Available in black and white.

Sikaflex®-255 Extra

High Strength Glazing Adhesive

Designed for the bonding of glass directly onto vehicles, boats and buses. Available in black.

Sika® Acrylic Acrylic Sealant

Flexible, one component, water based acrylic joint sealant and gap filler for interior use. Excellent adhesion to most building materials, water clean-up of uncured sealant and can be sanded back and painted over. Available in white and grey.

Anchorfix®-1

General Chemical Anchoring & Bolt Adhesive

Fast curing, high performance anchoring adhesive. Ideal for brickwork, stone, concrete, rock, etc. Used for threaded rods, starter bars, hinges and general anchoring. Apply in a normal cartridge gun. No special equipment required. Available in 150ml and 300ml cartridge.

Anchorfix®-3

Epoxy Anchoring & Bolt Adhesive

Non shrink for structural, higher load applications and large diameter holes. Can be used on damp surfaces and wooden substrates. Styrene free. Apply in a normal cartridge gun.

Anchorfix® Sleeves

Anchoring System

Used with Anchorfix® 1 and 3 adhesives when anchoring into hollow blocks and thin cavity walls etc.

SikaBond®-T55(J)

Elastic Timber Flooring Adhesive

One component high strength polyurethane based adhesive for direct fixing of flooring to concrete. Available in 600ml and 2kg sausage and 16kg pail.

Sika[®] Boom **High Density** **Expanding Foam**

Polyurethane based expanding foam. Great for all cavity and gap filling applications. Cuttable, sandable and paintable. Available in 500ml and 750ml.

SikaBond[®] **Multipurpose** **Construction** **Adhesive**

Multipurpose construction adhesive for bonding applications around the house and on the building site. Offers a small amount of flexibility.

Sikasil[®] -C **Roof & Gutter** **Silicone**

Multipurpose neutral cured silicone, provides weatherproof sealing in external and internal applications. Available in black, grey, mid grey, white and transparent.

Sikasil[®] -E **Window & Glass** **Silicone**

Acetic cured silicone used in many glazing and construction applications. Available in transparent and black.

Sika Sanisil[®] **Kitchen & Bathroom Silicone**

Mould resistant acetic cured bathroom/kitchen silicone. Available in white, transparent and almond ivory.
