

**V.I.P. FASTENING SYSTEMS PTY. LTD.**

# WINGFIX<sup>®</sup>

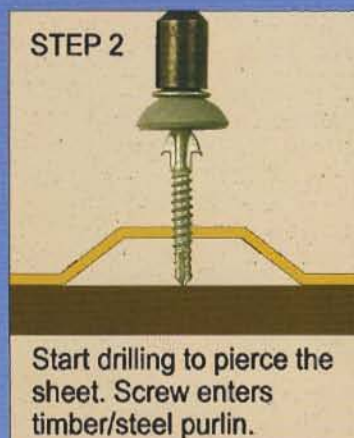

- No pre drilling required
- Unique wing design cuts its own thermal expansion hole eliminating the need for a second drill
- Self centres during installation
- Installed in half the time of conventional fasteners
- Comes pre-assembled with 22/26/32mm weather seal
- Modified drill point has been designed for fixing applications into both steel and timber purlins
- Wing designed to enable you to extract screw without damage to the roof
- Complies to Australian Standard AS 3566 CLASS 3 & 4 Specifications
- Self sealing EPDM washer

**SAVES TIME**  
**SAVES MONEY**  
**EXTENDS THE**  
**LIFE OF THE ROOF**

Place tip of Wingfix on the peak of corrugation PUSH firmly to avoid skidding.

Start drilling to pierce the sheet. Screw enters timber/steel purlin.

Wings cut an expansion hole and centres the screw.

Stop drilling when you feel resistance.
